Applied for MMC Accreditation points

NAVI MUMBAI MUNICIPAL GENERAL HOSPITAL ,VASHI & ASSOCIATION OF OTOLARYNGOLOGISTS OF NAVI MUMBAI RAIGAD

The advantage of an endoscope compared to the microscope is the wide-field view of the middle ear afforded by the location of the light source at the tip of the endoscope and the availability of angled lenses.

In contrast to the traditional otologic operating microscopes typically require post-auricular or endaural approaches to enable adequate passage of light for intraoperative visualization, the Middle ear procedures that employ a rigid endoscope for visualization may reduce the need for an incision & to drill for enhanced exposure to the operative field.

In the era of Minimal Invasive Surgery, it is EESSENTIAL to update ourselves about the recent trends in Otology. To contribute in this endeavour , we hereby announce 'EESSENTIAL' Endoscopic Ear Surgery Workshop on Sunday 8th May 2016.
