Organised by:

Welcome Message

Dear Friends and Colleagues,

The ENT Department at Khoo Teck Puat Hospital will be organizing the 3rd Singapore Advanced Rhinoplasty Fresh Frozen Cadaveric Dissection Course from 6 to 9 November 2016. This intensive course builds on the foundations laid during the very successful and well-received courses that we have conducted over the last 2 years. The course this year has been enhanced by incorporating the feedback from the participants and faculty of the previous courses.

The course comprises of two days of lectures and panel discussions covering the whole breadth of surgical challenges encountered during Rhinoplasty and practical tips on managing them safely, predictably and effectively. Structured panel discussions by our expert faculty will help delegates to consolidate their understanding of some of the common problems encountered during analysis, planning and execution of Rhinoplasty.

The next two days will be devoted to surgical dissection on high quality fresh frozen cadaveric specimens to provide extensive hands-on training in a wide range of surgical techniques used in Rhinoplasty. The laboratory portion of the course will be limited to 10 Dissectors and 10 Assistants to allow for intimate supervision by experienced faculty. A unique feature of our course is 1:1 Dissector to Cadaveric specimen ratio.

We are privileged to have an outstanding faculty from USA, Europe and Asia to share their extensive experience during the course. The teachers of honour for the course include internationally renowned Facial Plastic Surgeons Prof Peter A. Adamson (Canada), Prof Stephen W. Perkins (USA) and Prof Pietro Palma (Italy).

Singapore is a vibrant city with many historical and contemporary architectural landmarks. It is a culinary paradise, which offers richness and variety of experiences that will help you to enjoy Singapore in your own personal way. Travel to Singapore is easy as it is well connected to most major airports in the world.

We would like to extend our warmest welcome to you and look forward to your presence in the course.

Course Director

Dr Sandeep Uppal PhD, FRCS (ORL-HNS)

Adj. Asst. Prof in Otolaryngology,
National University of Singapore

Senior Consultant Otolaryngologist
Trained in Facial Plastic Surgery,
Khoo Teck Puat Hospital

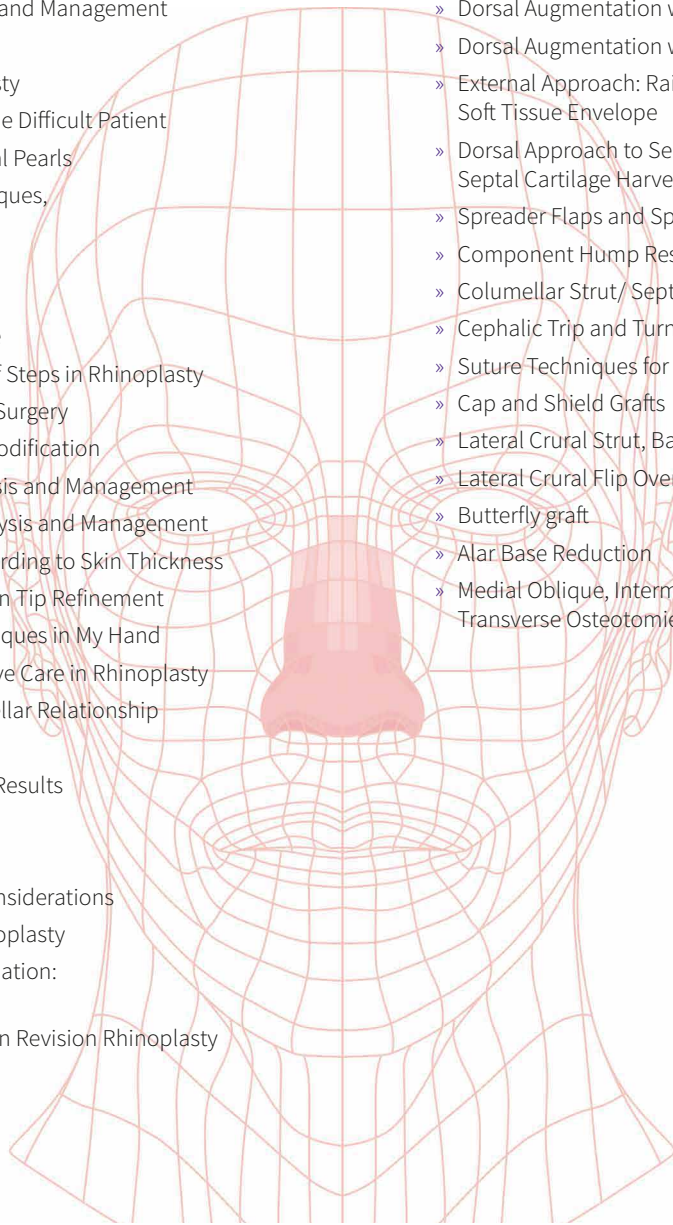

Programme at a Glance

Day 1 and 2: Lectures and Panel Discussions

- » Contemporary Concept of Nasal Aesthetics
- » Surgical Anatomy of The Nose
- » Rhinoplasty: Preoperative Assessment
- » Nasal Tip Projection: Analysis and Management
- » The Chin in Rhinoplasty
- » Cartilage Grafting in Rhinoplasty
- » Panel Discussion: Managing the Difficult Patient
- » Primary Rhinoplasty: Technical Pearls
- » Osteotomy: Principles, Techniques, Avoiding Complications
- » Management of Tension Nose
- » Management of Saddle Nose
- » Management of Crooked Nose
- » Panel Discussion: Sequence of Steps in Rhinoplasty
- » Tripod Principle for Nasal Tip Surgery
- » Suturing Techniques for Tip Modification
- » The Over Projected Tip: Analysis and Management
- » The Under Projected Tip: Analysis and Management
- » Customizing Rhinoplasty According to Skin Thickness
- » Panel Discussion: Challenges in Tip Refinement
- » The Ptotic Tip: Reliable Techniques in My Hand
- » Panel Discussion: Postoperative Care in Rhinoplasty
- » Managing Altered Alar Columellar Relationship
- » The Boxy Tip
- » Panel Discussion: Analyse My Results
- » Middle Vault in Rhinoplasty
- » Alar Base Refinement
- » The Oriental Nose: Special Considerations
- » Complexities of Revision Rhinoplasty
- » Dorsal And Caudal Septal Deviation: How Do I Manage Them
- » Panel Discussion: Challenges in Revision Rhinoplasty

Day 3 and 4: Fresh Frozen Cadaveric Dissection

- » Conchal and Rib Cartilage Harvesting
- » Delivery Approach
- » Endonasal Approach to The Nasal Dorsum
- » Dorsal Augmentation with Rib Graft
- » Dorsal Augmentation with Diced Cartilage Grafting
- » External Approach: Raising the Skin and Soft Tissue Envelope
- » Dorsal Approach to Septum and Septal Cartilage Harvesting
- » Spreader Flaps and Spreader / Extended Spreader Grafts
- » Component Hump Resection
- » Columellar Strut/ Septal Extension Graft
- » Cephalic Trip and Turn-in Flap
- » Suture Techniques for Tip Refinement
- » Cap and Shield Grafts
- » Lateral Crural Strut, Baton Grafts, Rim Grafts
- » Lateral Crural Flip Over Graft
- » Butterfly graft
- » Alar Base Reduction
- » Medial Oblique, Intermediate, Lateral and Transverse Osteotomies

Teachers of Honour

Prof Peter A. Adamson

Head, Division of Facial Plastic and Reconstructive Surgery
Department of Otolaryngology - Head and Neck Surgery
University of Toronto, Toronto
Canada

Prof Stephen W. Perkins

Clinical Associate Professor
Section of Facial Plastic and Reconstructive Surgery
Department of Otolaryngology - Head and Neck Surgery
Indiana University School of Medicine, Indiana
United States of America

Prof Pietro Palma

Clinical Professor
Department of Otolaryngology - Head and Neck Surgery
University of Insubria, Varese
Italy

Dr Gordon Soo

Chief, Division of Facial Plastic Surgery
Clinical Associate Professor (honorary)
The Chinese University of Hong Kong
Hong Kong

Registration Details

To register, visit www.SingaporeENTCourses.com.sg

Deadline for Early Registration: 15 Aug 2016

Registration Fees

Workshop Categories	Early Registration	Normal Registration
Time Frame	On or before 15 Aug 2016	After 15 Aug 2016
Hands-on Dissector <small>Limited Places!</small>	SGD 3,250	SGD 3,750
Hands-on Assistant <small>Limited Places!</small>	SGD 1,800	SGD 2,200
Observer with Lab Access (Non-assisting) <small>Limited Places!</small>	SGD 1,300	SGD 1,600
Observer without Lab Access		
• Doctor	SGD 700	SGD 900
• Nurse	SGD 400	SGD 500

- » Due to limited places available, registration will only be confirmed upon receipt of full payment, on a first-come, first-served basis.
- » Members of EAFPS will receive an exclusive discount of 15% off the registration fee. Proof of membership is required. EAFPS members will not be entitled to further discount for attending more than one course.
- » Participants attending all 3 courses in one category will receive a 10% discount off the registration fee.
- » Participants attending 2 courses in one category will receive a 5% discount off the registration fee.
- » Registration fee is inclusive of GST.
- » Workshop observers without lab access will be able to attend lectures and observe the cadaveric dissection through video link.
- » Nurses are required to provide a copy of their Professional Nursing Certificate.

Welcome Message

Dear Friends and Colleagues,

The ENT Department at Khoo Teck Puat Hospital will be organizing the 2nd Singapore Facial Rejuvenation Surgery Fresh Frozen Cadaveric Dissection Course from 10 to 12 November 2016.

The course comprises of a full day of lectures by expert international faculty that will help the delegates to consolidate their understanding of surgical anatomy, facial aesthetics, preoperative assessment, surgical planning and safe execution of surgical techniques used in Facelift, Midface lift, Browlift, Blepharoplasty and Otoplasty.

The next two days will be spent in the Surgical Skills Laboratory where participants will get extensive hands-on training in a wide range of surgical techniques used for Facial Rejuvenation. The laboratory portion of the course will be limited to 20 Dissectors and 10 Observers to allow for close supervision by expert faculty.

We are privileged to have internationally renowned Facial Plastic Surgeons Prof Stephen W. Perkins (USA) and Prof Peter A. Adamson (Canada) as Teachers of Honour for the course. The wealth of experience offered by them will provide a unique learning opportunity for the participants.

Singapore is a dynamic multicultural city popular with tourists from around the world. This Jewel of Asia is host to a number of outstanding historical and contemporary architectural landmarks. It is a culinary paradise with mouthwatering cuisines not only from the region but also from around the world. Singapore offers an abundance of unique experiences, which will help you to enjoy Singapore in your own personal way. Travel to Singapore is easy as it is well connected to most major airports in the world.

We would like to extend our warmest welcome to you and look forward to your presence in the course.

Programme at a Glance

Day 1: Lectures

- » Contemporary Concepts of Facial Beauty
- » Surgical Anatomy: Forehead and Brow
- » Surgical Anatomy: Eye and Periorbital Area
- » Anatomy of Midface, SMAS, Lower Face and Neck
- » From Youth to Old Age: What Changes with Facial Aging?
- » Pre-operative Analysis in Browlift
- » Endoscopic Browlift
- » Open Browplasty: Which Approach Should I Use?
- » Pre-operative Analysis in Facelift
- » Midface Lifting
- » Rhytidectomy: Lifting the Lower Face and Neck
- » MACS Lift
- » SMAS Plication, Imbrication, Deep Plane Facelift
- » Management of the Aging and Heavy Neck
- » Volume Restoration in Facial Rejuvenation
- » Facelift: Tips, Limitations and Complications
- » Aesthetic Pinnaplasty
- » Upper Lid Blepharoplasty
- » Asian Blepharoplasty
- » Epicanthoplasty
- » Ptosis Surgery
- » Lower Lid Blepharoplasty
- » Complications of Blepharoplasty and Their Prevention

Day 2 and 3: Fresh Frozen Cadaveric Dissection

- » Suture Double Eyelid Creation
- » Transcutaneous Upper Blepharoplasty and Double Eyelid Creation
- » Fat Preservation Transconjunctival Lower Blepharoplasty
- » Fat Excision Subciliary Approach Lower Blepharoplasty
- » Endoscopic Brow and Midface Lift
- » Temporal Lift, Direct Brow Lift, Midforehead Brow Lift
- » Trichophytic Brow Lift
- » MACS LIFT
- » SMAS Plication
- » SMAS Imbrication
- » Deep Plane Facelift
- » Platysmaplasty
- » Cartilage Scoring Pinnaplasty
- » Mustarde Pinnaplasty
- » Malar Reduction
- » Mandible Angle Reduction
- » Genioplasty

Welcome Message

Dear Friends and Colleagues,

The ENT Department at Khoo Teck Puat Hospital will be organizing the 3rd Singapore Facial Fracture and Soft Tissue Reconstruction Fresh Frozen Cadaveric Dissection Course from 13 to 16 November 2016.

This intensive course builds on the very successful and well-received courses that we conducted last year. It offers an excellent hands-on opportunity for Otolaryngology, Ophthalmology, Plastic Surgery and Maxillofacial Surgery Residents, Fellows and Consultants to expand their knowledge and surgical skills in the management of facial fractures and soft tissue injuries and defects.

The organizing committee has arranged an outstanding faculty from USA, Europe and Asia to share their extensive knowledge, skill and experience during the course. The teachers of honour for the course include Prof Alexander Schramm (Germany), Prof Stephen W. Perkins (USA) and Prof Peter A. Adamson (USA). The participants will also benefit from the wealth of experience offered by our outstanding multidisciplinary national faculty.

The first day of course consists of didactic lectures covering the common problems encountered in facial reconstruction. The next three days will be dedicated to surgical dissection to impart exhaustive practical training in all aspects of facial reconstruction. The laboratory portion of the course will be limited to 20 Dissectors and 10 Observers to allow for close and personal contact between the faculty and the participants.

Singapore is a dynamic and vibrant city and has much to offer to keep you occupied socially during your stay. Travel to Singapore is easy as it is well connected to most major airports in the world. We are confident you will have a memorable time during your visit to Singapore. We would like to extend our warmest welcome to you and look forward to your presence in the course.

Course Director

Dr Sandeep Uppal PhD, FRCS (ORL-HNS)

Adj. Asst. Prof in Otolaryngology,
National University of Singapore

Senior Consultant Otolaryngologist
Trained in Facial Plastic Surgery,
Khoo Teck Puat Hospital

Programme at a Glance

Day 1: Lectures

- » Assessment of Patients with Facial Injury
- » Management of Dentoalveolar Injuries and Occlusion in Facial Trauma
- » Craniofacial Anatomy and Biomechanics
- » Principles of Osteosynthesis and Choice of Plates and Screws
- » Naso-Orbito-Ethmoidal Fracture Management
- » Frontal Sinus Fractures
- » Head Injury: Assessment and Management
- » Management of Zygomatico-Maxillary Complex and Orbital Fractures
- » Management of Le Fort Fractures
- » Management of Condylar and Subcondylar Fractures
- » Management of Mandible Angle and Body Fractures
- » Symphysis and Parasymphysis Fracture Management
- » Sequencing of Panfacial Fractures
- » Subunit Approach to Facial Reconstruction
- » Management of Eye Lid Lacerations and Canalicular Injuries
- » Local Flaps in Facial Reconstruction
- » Principles of Facial Scar Revision
- » Nasal Reconstruction
- » Lip and Perioral Reconstruction
- » Ear Reconstruction

Day 2 to 4: Fresh Frozen Cadaveric Dissection

- » Z-plasty, M-plasty and Geometric Broken Line Closure
- » Helix Reconstruction with Advancement/Tube Flaps
- » Abbe Estlander Flap
- » Karapandzic Flap
- » Nasal Defect Repair: Bilobed Flap
- » Alar Defect Repair: Subcutaneous Pedicle Interpolated Cheek Flap and Conchal Cartilage Graft
- » Paramedian Forehead Flap
- » Coronal Approach to Zygomatic Arch and Frontal Sinus Fractures
- » Preauricular, Retromandibular and Transcervical Approaches to the Mandible
- » Transoral Approaches to the Midface and Mandible
- » Maxillo-Mandibular Fixation
- » Introduction to DePuy Synthes Matrix Sets
- » Creating a Le Fort 1 Fracture and Repairing It
- » Creating and Repairing Tripod and Orbital Floor Fractures
- » Creating a Parasympyseal Fracture and Repairing It
- » Creating a Mandible Angle Fracture and Repairing It
- » Creating a Subcondylar Fracture and Repairing It
- » Creating a Frontal Sinus and NOE Fracture and Repairing It
