LIMITED SEATS

International Symposium on Balance & Hearing Disorders

21st - 22nd JAN, 2017

Venue

ALPS Centre of Excellence
Sector 89A, Near Godrej Icon, Gurgaon

Organizing Chairman

Prof. (Dr.) Arun Agarwal

Organized by:

Mentors and Innovators

- Dr. Leonel Luis
- Dr. Sudhir Kothari
- AUD. Leigh Martin

Contents of the Program -

Master Class on Vestibular and Oculomotor Disorders

- Infant Screening using Wide Band Tympanometry a new concept in Middle Ear Testing.
- Workshop Master Class.
- Use of VEMP.
- Use of the Chirp Stimulus...the new Gold standard in ABR Testing.
- Practical Demo along with Diagnostics.

• VNG

• VOG

• VHIT

ECochG

What is EcochG and why is it performed?

- How to test and prepare the patient with TM-electrode or TipTodes.
- Recording and analyzing the EcochG recordings.

In this course you will also learn more about the special Interacoustics Area ratio calculation, improving detection of Meniere

Hands-on ECochG

oVEMP presentation

- What is oVEMP and why is it performed?
 - How to test and prepare the patient.
 - Recording and analyzing the recordings
- In this course you will also learn about the need for optimal gaze angle and electrode position, greatly improving the oVEMP recording. As well, will there be an instruction on how to use the powerfull B81 transducer for testing.

oVEMP Hands-on

cVEMP presentation

- What is cVEMP and why is it performed?
 - How to test and prepare the patient.
 - Recording and analyzing the recordings
- In this course you will also learn more about the special Interacoustics EMG patient monitor, EMG scaling, greatly improving the cVEMP recording.

eABR Theory (for testing Cochlear Implantees)

- What is eABR and why is it performed.
- How to test and prepare the patient.
- Recording and analyzing the recordings

In this course you will learn more about, how a cochlear implant can be adjusted and tuned in children and non-responsive patients.

eABR Hands-on
